

# **CLEANING & CARE GUIDE**

## **FOR THE CLEANING AND MAINTENANCE OF CERAMIC WALL AND FLOOR TILES**

All ceramic wall and floor tiles fixed are premium quality, white body ceramic and porcelain tiles, produced to exacting quality control standards using the most modern production techniques available.

With proper care and attention, correctly installed, good quality ceramic wall and floor tiles should give many years trouble free service. The following guidelines for cleaning and maintenance should ensure this.

### **GLAZED WALL TILES**

Glazed ceramic wall tiles do not require any special cleaning methods. Regular wiping over with a non-abrasive cloth in a solution of mild detergent is all that is required.

### **GLAZED FLOOR TILES**

Glazed ceramic floor tiles require the same cleaning methods as per glazed wall tiles. The biggest enemy of glazed floor tiles is however grit, brought into connection with the floor tiles via out-door footwear. Therefore the use of a good quality door-mat is essential. Mats should be placed adjacent to external doors, should be cleaned on a regular basis and replaced when worn out.
